

## JT-TC533W

### Independent Combustible Gas Detector

- D01
- measurement range: 0~100%LEL
- operating voltage: AC220V / 50Hz
- operating current: monitoring current 4mA, alarm current 10mA
- detection gas: natural gas
- an independent sounder strobe alarm function
- encoding mode: the controller is automatically assigned during the network
- communication mode: 470MHz FSK encoding bidirectional communication
- alarm set point: 8%LEL
- output mode: a set of DC9V active pulse output
- communication distance: <=700m
- sensor life: 5 years (typical value)
- weight: approximately 105g
- dimension: 80mm diameter, 52mm height
