

Mechanical Double Clipping Mchine

- Easy connected with various stuffing and filling machines to realize automatic production.
- Clipping much faster with non-stop working mode
- Quipped with automatic counting and cutting system, about 0-20 ties adjustable.
- Advanced control system of PLC.
- Automatic oil lubrication system to make for less impact force and lower noise.
- Unique design and work mode help on minimum maintenance.
- Easy change of clips without tools. Simple one button operation with the pneumatic swing-off and swing-on.
- Double vacuum filling horns system for changing of casing easily.
- Stainless steel structure and excellent surface treatment make for easy cleaning.
