

905nm  
Eye-safe Laser

Height  
Position

Small Size

Anti- Jitter

Speed  
Detection

Angle  
Measurement

Lightweight

High  
Transparency

## Advantages

High transmittance,  
good for night vision

Screw design,  
easy installation

Small size,  
easy to integrate

Protection cover  
sample package

## Technical Parameters

Measuring range: 3 - 1100m/1200m

Accuracy:  $\pm 0.5\text{m} \sim \pm 1\text{m}$

Volume: 43\* $\phi$ 25mm

Resolution: 0.1m

Weight: 15g

Working Voltage: 2.5 ~ 3.5V

Measuring time: less than 1s

Baud rate: 115200bps

Light: 905nm laser

Laser class: Class I

Operating Temperature: -20~50°C

Electrical Level: TTL/CMOS

Function: Measuring distance/height
