

## **POLYKEN sealing butyl tape**

### **System Description**

POLYKEN Sealing butyl tape is a kind of environmental protection waterproof sealing tape, it is main made by butyl rubber With a variety of other environmental AIDS, The environmental friendly solvent - free sealant is produced by special process Is an advanced environmental protection waterproof sealing material.

### **Features**

1. Can maintain flexibility and adhesion, can withstand a certain degree of displacement and deformation, and has good tracking
2. Strong waterproof sealing and chemical corrosion resistance, aging resistance, long weather service life
3. Excellent waterproof sealing on the surface of the adhesive has shock absorption, sound insulation, heat insulation, protection and so on
4. is not contain any solvent, does not shrink, does not contain toxic substance, does not emit toxic gas, safe and environmental protection

### **Main Application**

Mainly used in Noise and insulation of doors, floor, roof, hood, lights, etc  
car doors and Windows, And waterproof seals on auto sheet metal parts, is main , Mainly waterproof sealing, shock absorption, sound insulation, heat insulation, protection of the adhesive, Remove the release paper on the back of butyl adhesive tape, attach the adhesive tape to the adhesive material and compress to ensure the adhesive tape and adhesive surface

### **The Products Size**

Diameter 2-20mm or customized according to customer requirements

Color: gray, black, white
