

Fixing ground/pit scale

Product advantage

The platform uses cover plate structure, has camel color primer, has height of 148mm, is convenient for site installation and adjustment, and is suitable for ground or pit field.

Product application

Fixing ground/pit scale is widely used in industries such as metallurgy, chemicals, paper making, coal, building material, light industry, port, transportation, power and storage for trade settlement measurement and control.

Feature and advantage

1. Section steel frame: Durable
2. Foundation fixing: Anti-tilting impact
3. Wide application: Able to use in special fields such as explosion proof and antiseptis as option
4. Complete auxiliaries: Optional auxiliaries such as approach, large screen, computer and lengthening cable

Relevant product recommendation

1. L-BS-**-MG type load cell
2. XK3105 type weighing indicator
