

## MEIMAN LASER

ShanDong MeiMan Laser Technology Co., Ltd.

### Company Profile

"Innovation, breakthroughs, efficiency and service-orientation" are the core concept in the development MeiMan laser. We offer our customers customized solutions and technical services. "World laser technology for better life" is the vision of MeiMan laser. Shandong MeiMan Laser Technology Co., Ltd. is an innovative high-tech company specialized in laser marking, engraving, equipment-cutting. We are proficient in laser technology as well as in product design, Automatic focal length control, One button to intelligent marking, Patent product, Innovation design.

01

## MEIMAN LASER

**FM-P** Laser Marking Machine  
2 YEARS WARRANTY

One Button To Intelligent Marking

Automatic Focal Length Control

European Standard Of Protection

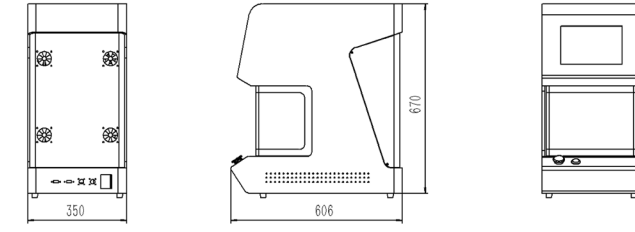

Beautiful Appearance And Reliable Quality

### Technical Parameter

Power: 20W / 30W / 50W  
Wavelength: 1064nm  
Frequency: 20KHz-80KHz  
Minimum shaping character: 0.15mm  
Engraving line speed: ≤7000mm / s  
Total power: <500W  
Laser module life: >100000hours  
Field lens: 100mm × 100mm / 200mm × 200mm  
Supported formats: bmp, jpg, gif, tga, tif, ai, dxf, dst, plt, etc.  
Marking format: graphics, text, numbers, bar codes, two-dimensional code, real-time, batch number, etc.

### Dimension information

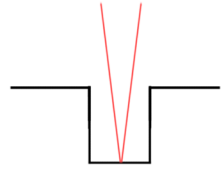

02

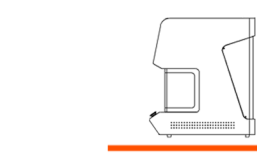

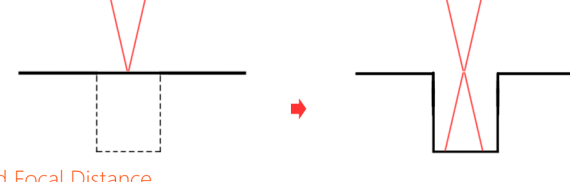

20W、30W、50W

**Deep Engraving**  
The focal distance is changed after each pass.  
This allows for processing with maximum energy density at all times.

**Fixed Focal Distance**  
As the target is engraved, the surface being processed gradually moves further away from the focal point, making it impossible to apply sufficient energy.

contraverted and not simple

Our goal is to make the laser marking easier

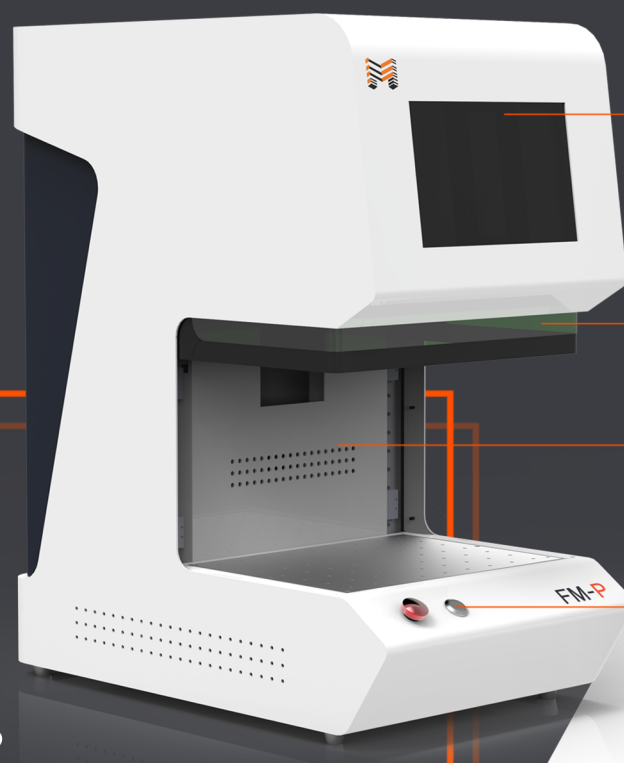

Integrated computer installation

Choose different configuration, custom function requirements

03

How To Design ?

10 Inch Screen

Laser Protective Glass

Open Space

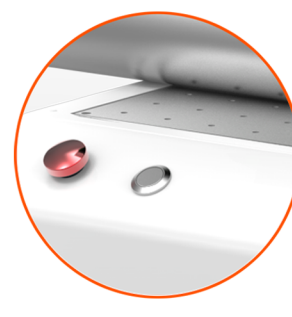

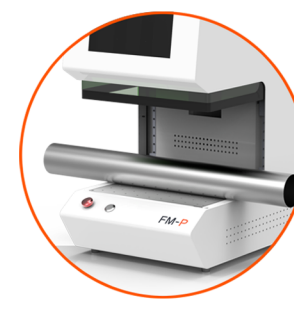

A key marking
