

PIB Mono Succinimide Ashless Dispersant Additive

●Product Introduction

T151 is Mono Polyisobutylene Succinimide Ashless Dispersant made from high active polyisobutylene, with excellent low temperature detergency capability and good solubility of high temperature soot. It can be widely used in modulating high grade internal combustion engine oil. It doesn't contain chlorine, it has preferable compatibility with detergent and antioxidant and corrosion inhibitor.

●Product Technical Index

Item	Typical value	Test method
Appearance	Viscous clear liquid	Visual inspection
Kinematic Viscosity (100°C), mm ² /s	180	ASTM D445
Total Base Number, mgKOH/g	50	ASTM D2896
N content, m%	2.1	ASTM D3228
Flash Point (COC), °C	200	ASTM D92
Color Number (diluted)	3.0	ASTM D1500

●Package, Storage and Transportation

The product is packed with iron drum, net weight of 170kgs/drum, suitable for all means of transport. For short-term storage and transportation, the temperature of the product shall not surpass 75°C; for long-term storage, it shall not surpass 45°C. The shelf life of this product is 24 months. And it shall be stored in dry, cleaning, and ventilated warehouse.
