

V-CUT Aluminum Multi-blades PCB Separator

Model :SF-710

Features:

1. Stable cutting process which greatly promote the positioning ability of V-CUT slot. Even for the circuit board with flat V-CUT, the V-CUT slot will not be skipped out from the guide knife; The abnormality can be avoided.
- 2.The cutting for circuit board is completed by six blades; the two blades at top and bottom constitutes into a cutting unit, e.g. A, B and C groups.
- 3.The edge of the circuit board after cutting is smooth and the surface is level without twisting or warp. During separating, keep the PC plate still when the blade slides back and forth.
4. Small cutting force of the blade which can greatly promote durability of the blade and reduce use-cost.

Specifications:

- Power: 110v/220V AC 60 /50 HZ
- Size: L540mm*W280mm*H240 mm
- Weight: 26KG
