

BILL PAYMENT KIOSK SOLUTION

【Model SKTD-1047 Series】

2021.12.17

Introduction:

This Kiosk is originally designed for Payment Service Provider who want to extend their business scale from online to offline, or to compete with the counterpart in the market by providing value-added service. This lobby kiosk is designed with capacitive touch screen as the main operation panel, which offer the tactile operation experience for the end user; Equipped with one cash recycler module, this kiosk can **handle banknotes** more than bank cards. We specially designed on POS holder so that PSP can select the proper POS to provide the bank card service, but **without additional investment** on the complicated bank card transaction. Nowadays, this kiosk has X86 platform and Android platform to meet different requirements from client.

Product Features

- ✧ **Dual Screen design**, 17 inch CAP touchscreen for operation and 19 inch display as digital signage.
- ✧ Equipped with **Cash Recycler** to handle most of the banknotes.
- ✧ Equipped with **door alarm sensor** to detect the illegal opening.
- ✧ Reserved the **mounting holes** in the bottom to allow fix the machine with anchor bolts.
- ✧ Reserved **POS holder** so that PSP can provide bank card service;
- ✧ **All drivers** from windows to android will be offered.

Application Scenarios:

- ✧ Mobile Phone Top Up; Utility Payment; Electricity or Gasoline Payment; Toll payment; Prepaid Card Top Up; Internet Account Top Up, or other service developed by PSP.
