# Cell Strainers.

# UNIFORMITY

Strain your stem and primary cell samples with Cell Strainers.

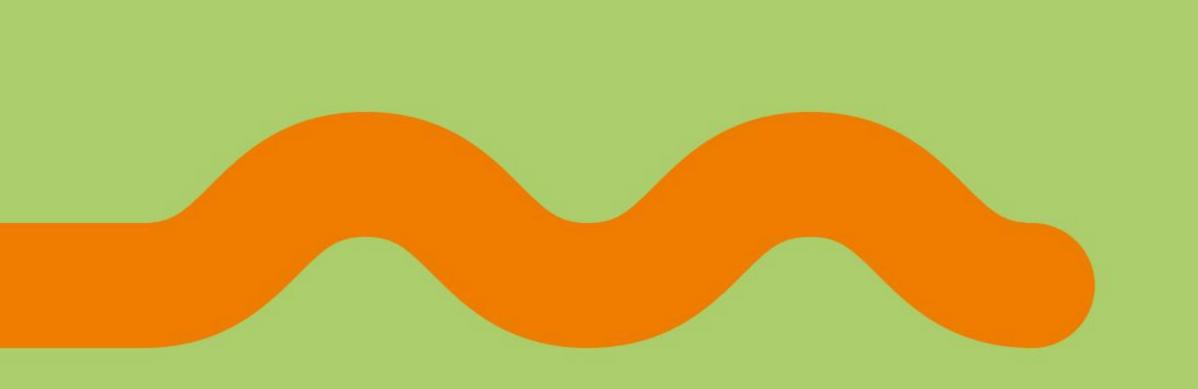

Available in three sizes, the nylon mesh provides you with uniform cell suspensions from tissue and preparation of flow cytometry samples.

### KEY BENEFITS

- Uniform nylon mesh size of 40 μm, 70 μm, and 100 μm (colour-coded)
- Extended lip on the strainer enables aseptic handling with forceps
- Designed to fit into a 50 ml conical centrifuge tube
- RNase, DNase and Pyrogen free

40 μm Cell Strainer 50 Blue (Sterile)	Description	Pack Size	Colour
	40 μm Cell Strainer	50	Blue (Sterile)
70 μm Cell Strainer 50 White (Sterile)	70 μm Cell Strainer	50	White (Sterile)
100 μm Cell Strainer 50 Yellow (Sterile	100 μm Cell Strainer	50	Yellow (Sterile)

50 ml centrifuge tubes

# 15 ml & 50 ml Centrifuge Tubes.

#### DESIGNED FOR CELLS

centrifugation of cells, but can be used for standard centrifugation, preparation and storage applications. USP Class VI polymers and certified non-toxicity ensure the viability and integrity of cells. The sterility of assurance level (SAL) of 10<sup>-6</sup> fulfills the highest demands on sterility, meeting EN 556-1 standard (Sterilisation of Medical Devices).

## Maximum centrifugation rates

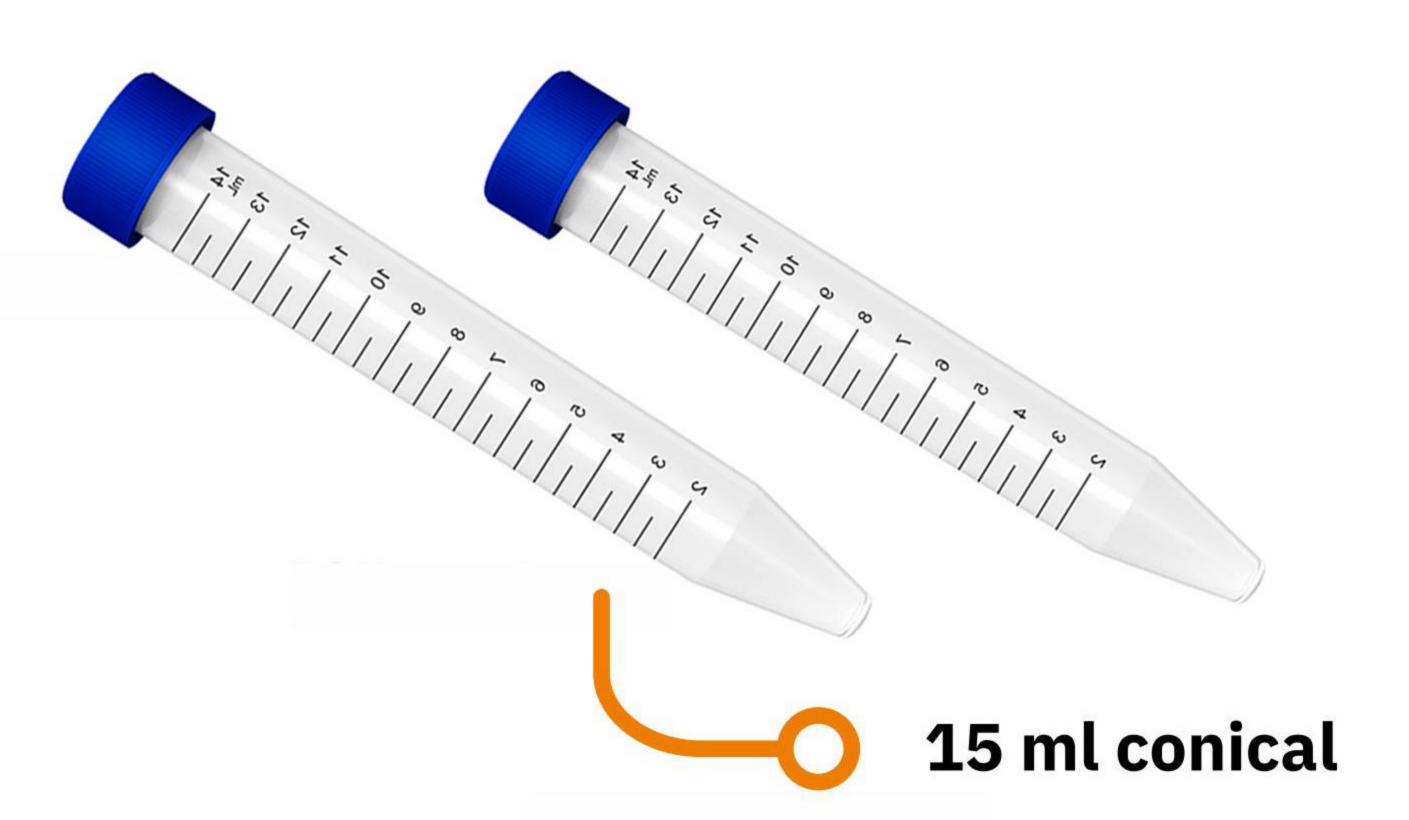

Conical Tubes 15 & 50 ml: 12,000 x g Skirted Tube 50 ml: 6,000 x g

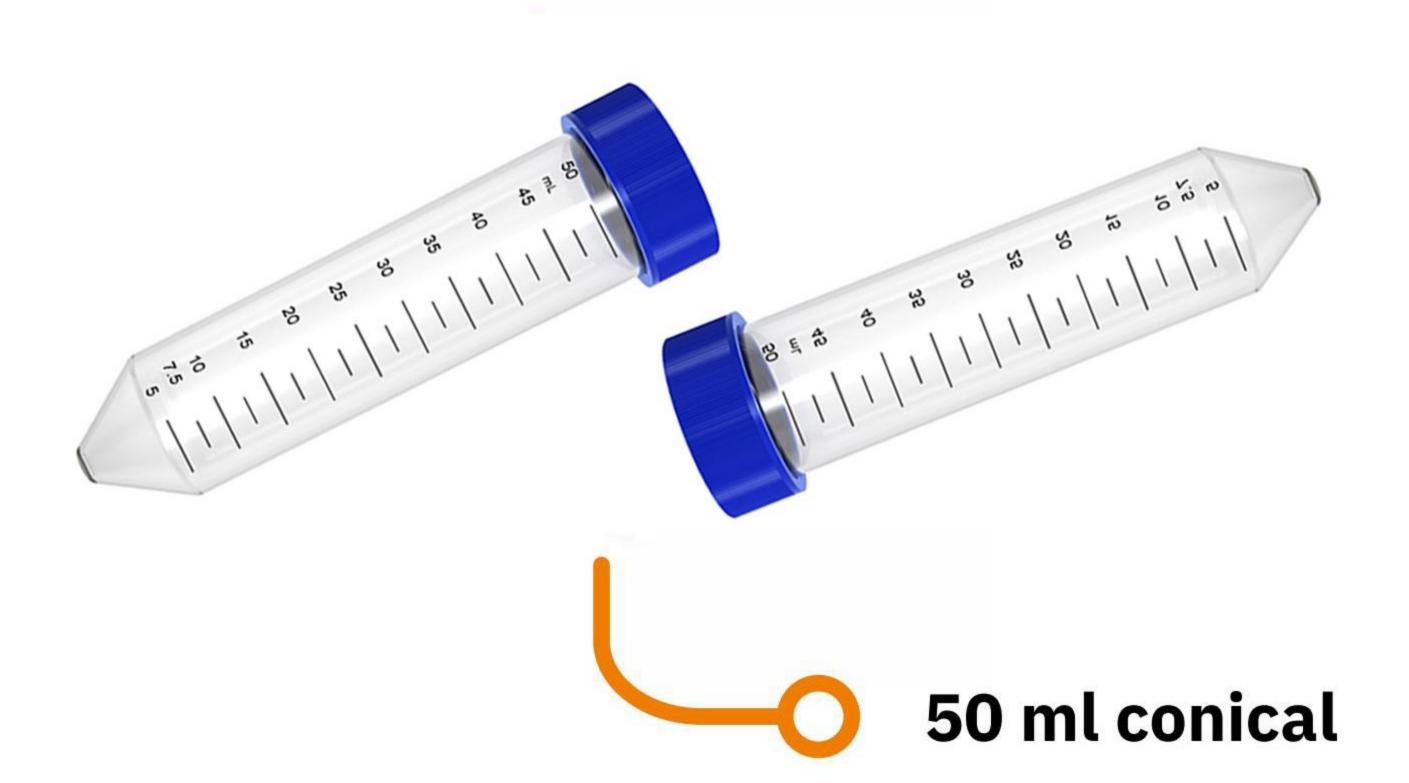

KEY BENEFITS

- © Clear, sterile polypropylene tubes with green HDPE screw caps
- White writing surface and clearly printed graduations
- Shorter length, 2.5 turn screw caps with sealing ring prevents leaking
- Perfect for centrifugation of cells: USP Class VI, non-cytotoxic and sterile (SAL 10<sup>-6</sup>) material
- O Certified RNase, DNase, DNA and Pyrogen free
