

# ASTAXANTHIN

## Always focus on the natural and healthy products

- Amulyn specializes in producing astaxanthin products. The raw material comes from Haematococcus pluvialis cultivated in Yunnan Plateau to extract pure natural astaxanthin. Haematococcus pluvialis is the organism with the richest astaxanthin content in nature and is known as the "concentrated product" of natural astaxanthin. Use modern biotechnology to research, develop, produce and sell astaxanthin products of various specifications. Manufacture has ISO9001, FSSC22000, BRC, cGMP, Halal, Kosher and other related certificates.
- Astaxanthin is a fat-soluble and water-soluble pigment, which cannot be synthesized by human body itself. It is the strongest antioxidant in nature. Its antioxidant activity is 550 times that of vitamin E and 10 times that of  $\beta$ -carotene, so it is called "the king of antioxidation".

### Haematococcus Pluvialis Extract Powder (1%-5%)

Solubility	Fat-soluble
Application	Tablets, cosmetics, animal health products
Advantages	Cost effective products

### Astaxanthin CWS (1.5%, 2%)

Solubility	Water-soluble
Application	Solid beverage, collagen beverage, tablet, high-end cosmetics
Advantages	High absorption rate, instant in cold water and good stability

### Astaxanthin (2%-10%)

Solubility	Fat-soluble
Application	Soft capsules or fudge
Advantages	The liquid state is suitable for jelly candy and soft capsule products

### Astaxanthin Aqueous Solution (1%)

Solubility	Water-soluble
Application	Cosmetics, beverages, snacks
Advantages	Instant cold water, good stability and strong coloring power
