

OAT POWDER

Always focus on the natural and healthy products

As one of the most popular grain products, Amulyn specializes in the production of oat powder, selects high-quality oat rice, and processes oats by spray drying and enzymatic hydrolysis. Enzymatic oat powder uses special complex enzyme preparations for enzymatic hydrolysis reaction, adopts advanced plant milk extraction technology and spray drying technology and instantaneous cooling direct injection sterilization of less than 1 second to achieve more stable liquefaction, saccharification and enzyme killing process, reduce the loss of oat flavor, and more effectively retain the original aroma and nutrients of oats. Unique high-quality enzyme preparations can achieve the best taste of oat powder.

BEST-SELLER

1 Enzymolysis Oat Powder GMFO12A

Enzymolysis Oat Powder GMFO12A is prepared by pure oat enzymatic hydrolysis, which can achieve instant dissolution in cold water, with Mild oat and malty aroma, creamy mouthfeel with slight sweetness, and can replace milk as an important ingredient in plant milk, solid drinks and ice cream.
