

MACADAMIA

Opening, high kernel rate, low bad fruit rate

AGOLYN strictly follows the national production process standards and uses good raw materials.

Strictly selected diameter

Delicious and easy to peel

Own planting base fresh raw materials

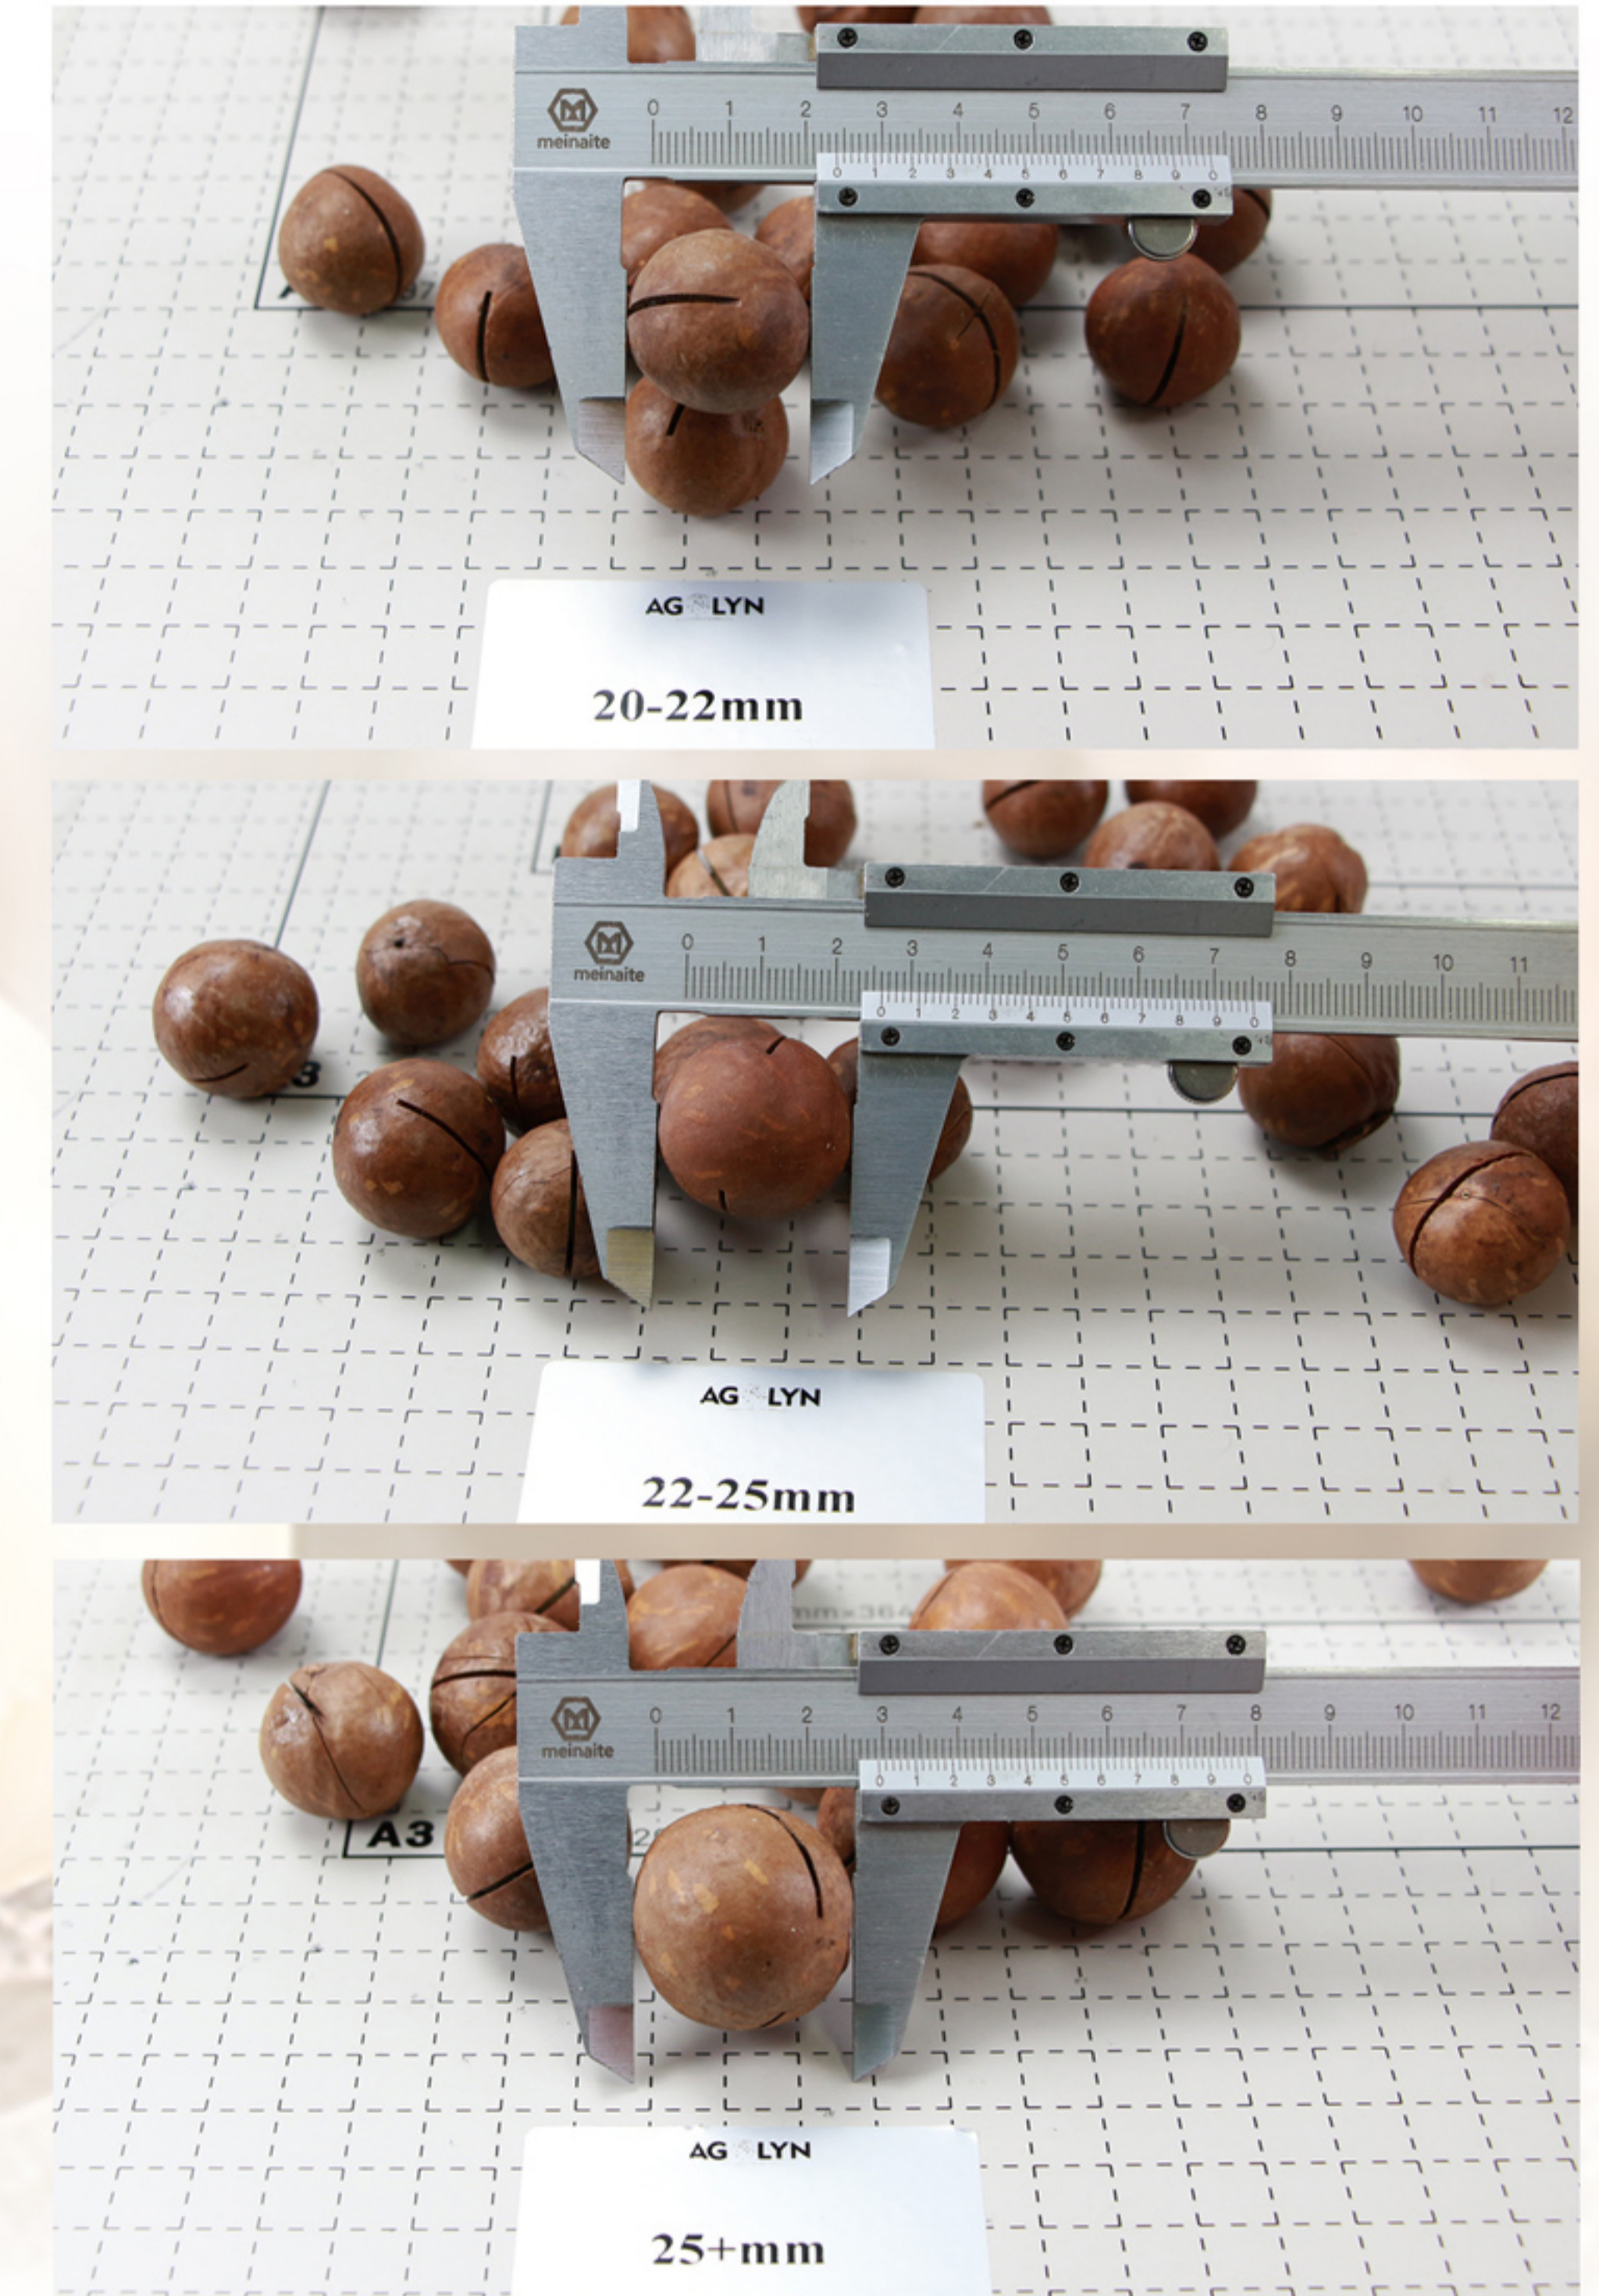

Advantageous producing area, China is already the largest producer of macadamia nuts in the world. The planting area in Yunnan Province alone accounts for 57% of the total planting area in the world, and the output also exceeds the sum of foreign countries. AGOLYN's own contracted planting bases provide high-quality products. Meanwhile we visit the world to find good sources of goods and provide high-quality macadamia.
