mix with 13.5ml injection
water+4.5ml lidocaine

★500mg
1 vial/box
mix with 19ml injection
water+6ml lidocaine

Reborn™

Safety:

PLLA is a **biodegradable** material with good bi-
absorbability and bio-compatibility. It degraded in
the body, the final substance changed into **carbon
dioxide** and **water** out of the body, so there are **no
side effects**. Widely used in the field of medicine.

Through the dermis, subcutaneous tissue of injection
can stimulate to produce collagen and proliferate
elastic fiber, effectively **improve the slack skin,
wrinkles, depression** and other skin problems.

Pre-op

Wrinkles before treatment

Post-op 1D

Injected volume immediately fill wrinkles and volume defects

3-4D

Within few days , the water in reborn is absorbed by body with a slight increase in wrinkles depth

7-14D

The 2nd phase consists of a natural soft build-up of connective tissue ,smoothing out wrinkles and contour defects

28D

After approximately 4 weeks clear improvement can be seen , larger volume defects may involve further treatment

Filling hands

Fading neck wrinkles

Lifting breast

Breast shaping

Female vagina compacting and shaping

Male penis enlarging

Microneedling Strategies

Collagen Induction Therapy (C.I.T.)

What is Microneedling?

Microneedling is a very versatile treatment technique that can be effective in addressing a mosaic of cosmetic and medical concerns, including skin rejuvenation, acne, acne scars, posttraumatic/burn scars, alopecia, drug delivery, hyperhidrosis, and stretch marks.

The technique itself has a positive safety profile. Adverse events associated with the procedure, although not zero, are usually minimal and quickly resolve.

Let's get things rolling!

DRS 540 DERMA ROLLER SYSTEM

- Package size: 165mm x 45mm x 40mm
- Needle material: stainless steel / titanium
- Handle/roller material: pc + abs

Microneedling pen/Derma pen

Dermapen microneedling (also called Collagen Induction Therapy) is a minimally invasive, effective technique for improving skin quality, decreasing fine lines, evening out skin tone, and diminishing scars from acne, injuries, and stretch marks.

The dermapen has tiny needles at the end that make little holes or needle pricks in the top layers of your skin.

Microneedling pens penetrate more deeply and are usually performed by physicians or relegated staff in clinic.

M8 (wired or wireless) AUTO MICRONEEDLE SYSTEM

Package Size: 170MM x 130MM x 60MM

Power supply; ac/dc

Input: AC 100-240V 50/60hz

Output: dc-5v, 1a

Needle length; 0-2.5mm

Product material : aluminum alloy

Packaging material : COLOR box

6-level speed adjustable, LCD display speed

Equipped 6*16 pins needle+6*36 pins needles

3-slotted bayonet design, more stable connection

High-speed internal motor, super silent

Economic design ,comfortable to hold

A wide variety of cartridges for option

Rimless L7

Auto Microneedle System

— Newest Generation of Derma Pen with 7
Color LED Photon Therapy

Model: Rimless L7

Needle: 12PIN*6+36PIN*6(More cartridges for option)

Needle length: 0-2.5MM
