

## Facial blackhead suction beauty machine

### Product accessories

### Instructions:

1. Dry your hand before using the machine in case that any liquid comes into the machine body from the vent hole on the back, which will damage the machine.
2. Make sure that the filler sponge is properly installed in the suction hole before using, and the sponge and the area to be treated are dry.
3. Do not wash the machine with water.

## Manual

### Operation methods

#### Smoothing and lightening skin

1. Change to the microcrystalline head or big round hole head. Make your face clean and dry.
2. Move the machine upwards from the bottom of your chin.
3. Move the machine down the bottom of the T zone.
4. Place the instrument on the cheek and move from the inside to the outside.

#### Cleansing pore deeply

1. Change to the big round or small round head (choose according to your skin condition).
2. Aim the round head at the location of the blackheads and acne to remove them. The levels can be adjusted according to your need. Method: When removing blackheads, move slowly on the location of the blackheads for several times. Do not move back and forth, but move in one direction. For acne, suck and then quickly unplug.

#### Fading fine lines

1. Change to the oval hole head.
2. Hold the machine by hand and cleanse eye corners, around nose and mouth etc. Levels of the machine can be adjusted according to your need. Method: Suck the skin to be cleaned, quickly unplug, and then suck again, unplug again. Repeat for several times, which will take effect on the skin deeply, stimulate skin blood microcirculation, increase skin elasticity, and prevent from growing deep wrinkles.

#### Installation notes of replaceable suction head and sponges

1. Put the filter sponge into the suction hole.
2. Press the filter cover into the suction hole.
3. Press the suction head into the nozzle.

#### Tips

1. The machine has lifting effect, and it is not recommended to be used on wounded, scarred skin.
2. Microcrystalline head has microdermabrasion effect. For dry skin, use once a week; for oily mixed skin, use twice a week. Use for no more than 5 minutes each time depending on the skin condition.
3. Do not force the head on the skin, as the machine has lifting effect.
4. After using, you may feel a little irritated or the skin will be a little red, which is a normal phenomenon, and this phenomenon will disappear after 10 minutes.
5. After using, make sure to moisturize your skin, prevent it from radiation, minimize skin pores and so on.
6. Before using this machine, do not use scrub cream or other exfoliating products, but steam your face over hot water to open the pores.

In order to use the facial blackhead suction beauty machine correctly and effectively, please make sure to read this manual, instructions and notes, and keep the manual well.

#### Product description:

Facial blackhead suction beauty machine is a multi-function beauty machine, which integrates dermabrasion, skin lightening, pores, blackhead and acne cleaning function. This machine uses vacuum suction device equipped with microcrystalline particles for off aging top skin layer and remove dirt inside pores, so that the pores become fine immediately, skin becomes bright, tender, uniform and smooth. This is a non-invasive and non-irritating technology, which controls the degree of microdermabrasion and changes the fineness degree of the microcrystalline suction head. With 4 different shapes of the suction heads, this product integrates 4 different effects, that is, microdermabrasion, skin lightening, pores cleaning and acne removing.

#### Working principle

##### Pneumatic vacuum face lifting V shape technology:

The vacuum suction system gently lifts and massages the skin, making the dermal tissue get enough nutrition, and the skin becomes tighter, enhancing the permeability of the skin, so that the beauty serum can penetrate into the deeper skin tissue, and thus improving skin moisture, which makes the skin become brighter and shinier, enhancing the skin's defense capabilities, to avoid the dirt damaging the skin, and to maintain skin firmness and elasticity, and thereby preventing skin from wrinkle growing and aging, promoting the regeneration of epidermal cells, enhancing the skin immunity and the ability of resisting ultraviolet radiation, avoiding melanin, keeping the skin bright, and making the skin healthier; improving skin microcirculation, and thereby fading melanin spots.

#### Microcrystalline probe

Microcrystalline probe equipped with natural mineral microcrystalline particles, can gently exfoliate, and make the skin become more smooth and renewed. It will gently rub off rough skin surface, debris and suck out the dirt from the skin. While removing dead skin cells, it will benefit natural renewal of cells and keep the skin smooth.

#### Product parameters:

Product Name: Facial Cleaning Beauty Instrument  
Battery capacity: 720mAh  
Voltage: 3.7V  
Rated current: 230mA  
Rated power: 0.8W  
Charging method: USB charging  
Product size: 175\*46\*47mm  
Weight: 150g

#### Product accessories:

1. main machine x 1
2. microcrystalline head x 1, big round head x 1, small round head x 1, oval head x 1
3. filter sponge x 1 package
4. USB charging line x 1
5. product manual x 1

### Product effects

1. microcrystalline head (exfoliating): its microcrystalline line head equipped with microcrystalline particles is of moderate suction intensity. With no harm to the skin, it massages the skin better, and at the same time has exfoliating effect, achieving skin renewal.
2. big round head (sucking out blackhead, skin tightening): big round head has strong suction, and is used for sucking out blackhead and grease. Appreciate for the skin lifting and massage effect through suction function of the machine, it has deep effect on underlying skin, stimulates skin's blood microcirculation, which leads to skin tightening.
3. small round head (deep cleansing): small round head has weak suction. Aim the hole at the blackhead or acne location to suck out dirt, blackheads, grease and acne. It is suitable for thin and sensitive skin.
4. oval head (fading fine lines and increasing the elasticity): its oval design is special for lifting and massaging places, where fine lines often appear and is not easy to be cleansed, such as the eye corners, nose sides, mouth corners etc., so as to promote skin's blood microcirculation, increase skin elasticity and fade fine lines.

### Areas applicable

Microcrystalline head:  
any part of the face except the eye corners, also rough and wrinkled skin, such as the body / elbow and knee etc..  
Big round head:  
any part of the face except the eye corners.  
Small round head:  
sensitive skin such as eyes, also other parts of the face.  
Oval head:  
eye corners, nose sides, mouth corners, also neck.

### Product features:

1. Interchangeable suction heads: Suction heads are interchangeable according to different effects as required.
2. adjustable intensity: High, medium and low levels are optional according to your need.
3. easy to clean: Four kinds of suction heads can be easily removed and cleaned, and with filter sponges, dirt and aging keratin are effectively prevented from clogging the machine. Sponges can be reused after cleaning.
4. physical skin care: The machine is safe / convenient to operate with no edge effects or side effects. You can work or join in community activities immediately after use. Occasionally there will be skin redness after use, which is a normal phenomenon, and the phenomenon will automatically disappear as soon as you stop use it.
5. small, easy to carry: Rechargeable, small and easy to carry.
6. high-capacity and rechargeable: With built-in high-capacity rechargeable battery or 850mAh, 5V USB portable design, the machine can be charged with Charge Paj mobile phone charger of universal charging plug or devices with USB connections such as computers and portable lighters to achieve beauty care at home, office and outdoor.
7. charging LED: When the machine is being charged, the blue light flashes in cycles. When the machine is fully charged, the blue light keeps being on.
8. low voltage indicator: When the battery voltage is lower than the required voltage, the weak suction or automatic shutdown indicates that the machine needs to be charged.
9. note: Keypressing the switch for 3 seconds to turn off the machine no matter it is in what level.
