G.W.:23kgs

1 Pull out the nail from tire.

2 Clean the injury with the open end inserting tool. Following the direction of the injury and twist 3 times in hole inside.

To easy repair, using a little of solution on the screw head of the tool and insert to the injury hole.

3 Feed the tire seal string to open end inserting tool. Also using a little of solution on the surface of seal string.

4 Insert the tool by hand into injury through the tire from outside to inside about 1cm. Then twist it. Put out the tool directly.

Pull it outside
