### Choicy Beauty Equipment Series

#### -- Q-switched Nd: Yag Laser

**Model: CB-311A**

#### Product Description

## **System Characteristics**

1. Unique water cycling technology , so it can be used directly without preheating .
2. Microcomputer controlled, so it is very precise and safe.
3. Plastic shell features anti-static and anti-interference; with touch color screen, it is easy for operating
4. Smart cooling system, which protect the machine working within normal temperature .
5. The internal structure of modular design, so it is convenient for test, repair and maintenance .

## **Treatment Range**

1. 1064nm laser can penetrate into deep layer of the skin, so it is easily absorbed by blue, black and green color pigment; therefore, it is very suitable to treat the pigment disease in the dermal layer. For example, getting rid of tattoos, eyebrow tattoos, Ota's nevus and pigmentation disease.
2. 532nm laser can penetrate into light layer of the skin; therefore, it is very easily absorbed by the
