### S02168: Plastic Bottle Cap Automatic UV Offset Printing Machine

#### Machine Features:

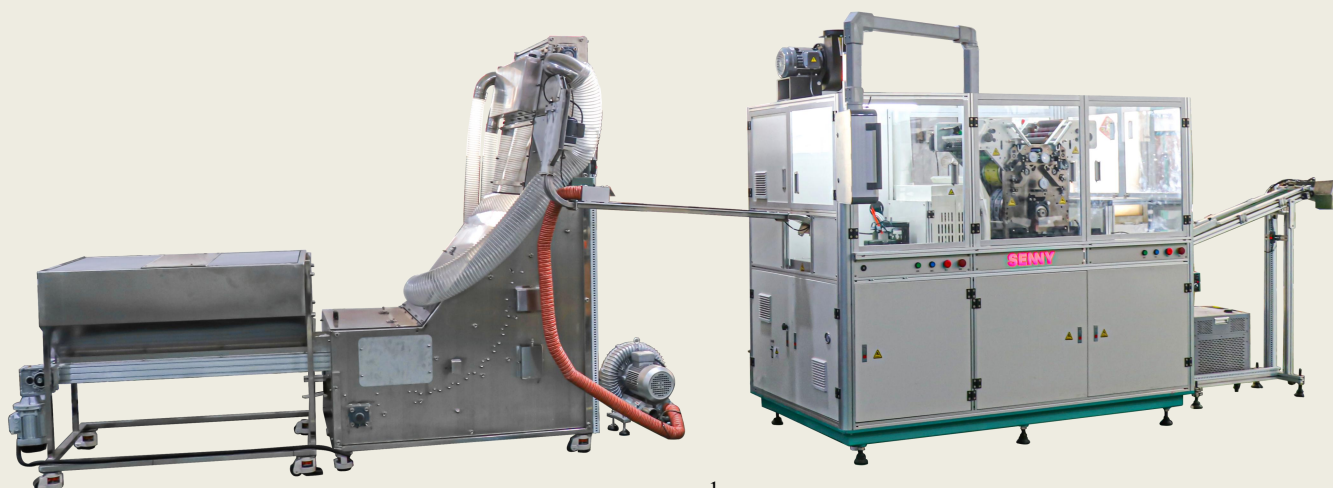

- The machine is suitable for printing UV inks of various colors on the top of plastic bottle caps.
- Optional 1-4 color variable speed printing system, accurate color registration.
- The machine adopts well-known brand electrical components, easy-to-use touch screen and PLC control system, with reliable performance.
- The machine can be connected with cap making machine, cap slitting machine and quality inspection machine.

#### Optional Configuration:

- Unscrambling & feeding machine.
- Plasma surface treatment function.
- LED-UV curing system.
- Cap slitting machine
- Quality inspection machine.

#### Technical Parameters:

- Printing Speed: Up to 1600pcs/min
- Bottle Caps Diameter: 28-38mm
- Printing Diameter: Less than 35mm
- Printing Color: Available in 1-4 colors
