Flux Gate Current Sensor DXE100-210-G I_{PN} = 100 A

The DXE100-210-G is a advanced flux gate current sensor that use high technology to bring the best combination of performance and reliability. It is rated for a primary current measurement range of ± 100A dc. It is calibrated and temperature compensated for improved accuracy using multi-point temperature characterization.

DIFFERENTIATION

● Accuracy: Multi-point temperature characterization and calibration for improved accuracy over temperature range.

● Magnetic immunity: Flux gate configuration and optimized magnetic circuit allow for excellent performance in diverse magnetic environments.

● Flexible: Customizable on-board firmware to meet specific application requirements.

Features

● Excellent accuracy

● Very good linearity

● Low temperature drift

● Wide frequency bandwidth

● Optimized response time

Application Domain

● Metrological verification and calibration

● Laboratory current measurement

● Instrumentation (e.g. power analyzer)

● Medical equipment, such as magnetic resonance imaging（MRI）

● Battery pack detection

● Power control

Electrical data

Parameter	specifications			Condition
	Minimum value	Standard value	Maximum value	
Rated input current $I_{PN=}$		±100 Adc		/
Measure range $I_{PM=}$			±150 Adc	1Min/Hour
Power supply voltage V_C	±12 Vdc		±15 Vdc	Full range
Current consumption I_C	±20 mA	±120 mA	±220 mA	I_{PM} range
Current change K_N	1000:1			Input : Output
Rated output current I_{SN}		100 mA		Rated input current
Measuring resistance R_M			40Ω

NOTE

● When the direction of the input current IP is consistent with the direction indicated by the arrow in the outline drawing, the output current IS is in the forward direction.

● Please try to locate the primary conductor at the center of the probe aperture as much as possible.

● The through-hole is made of metal material, so the through-hole wire cannot be an exposed cable. The through-hole wire must be insulated.

● This module is a standard sensor, please contact us for special applications.
