

Manta F1017A

Hair and Skin Care Silicone Fluid

Description

Manta F1017A is a polyorganosiloxane mixture, which has high affinity for the skin and can form a complete and uniform silicone protective film. It can produce a unique smooth, moist and silky feeling in skin care products. , non-greasy, does not clog pores, as a carrier can give the product more luster and texture, and enhance the persistence of other active ingredients on the skin. In hair care products, after use, it can significantly improve the silkiness and moistness of hair, and improve the gloss and texture of hair.

Typical Physical Properties

INCI/CTFA	Dimethicone (and) Dimethiconol
Appearance	Colorless transparent fluid
Refractive index (25°C)	1.395-1.405
Specific gravity (25°C)	0.900-0.940
Viscosity (cSt, 25°C)	3,000-5,000

Note: These values are not intended for use in preparing specifications.

Properties

- Polydimethylsiloxane mixture;
- Low volatility;
- Easy to form a complete and uniform silicone protective film;
- Gives products a long-lasting smooth, moist and silky feel;
- Smooth but not greasy, does not clog pores;
- Reducing the rub to keep the skin smooth and water proof;
- Excellent hydrophobic ability;

Applications

Manta F1017A has a wide range of applications, such as hair and skin care products, sun proof products, styling aids, skin care creams, make-up, etc.

How to use

This product has good compatibility with oil-soluble cosmetic raw materials such as oils, flavors and

fragrances. It is recommended to use cyclic silicone oil as a diluent in any proportion; it can be hot-mixed, but it is recommended that the operating temperature be lower than 85°C and heated before emulsification. Don't take more than half an hour.

The recommended usage level of the product is 3%-10% in skin care creams, 3%-6% in hair care products, 40-50% in hair oil products. It is recommended to pass tests to Determine the optimal dosage.

Packaging

In 50kg pail, 195kg iron drum

Safety and Storage

Keep away from heat and open flame. Prevent from the exposure of moisture, acid, alkalis and other impurities. When stored at well in the original unopened containers, this product has a usable life of 24 months from the date of production (drum packing). This product is non-hazardous product.
