# Company Profiles

## Part 01

"Ride people" are willing to cooperate sincerely with new and old customers at home and abroad, make joint efforts and grow together, and strive to create an "eternal boutique" in the drying industry!

"Rui De Drying - Professional Manufacturer", the company has developed a series of drying equipment with high drying efficiency, easy operation and control of energy saving. The equipment is widely used in pharmaceutical, chemical, food and other industries. In order to make the design scheme more operational, the company also has a variety of test prototypes for customers to test with materials to obtain various practical data.

## Company Profile

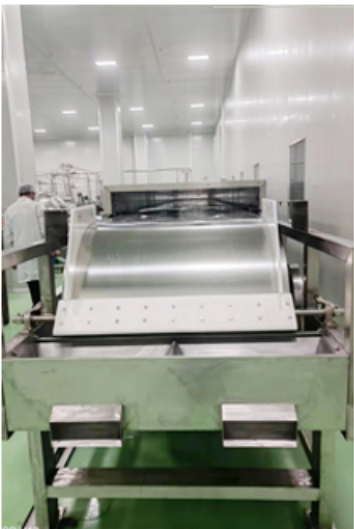

Changzhou Ruide Drying Engineering Technology Co., Ltd. specializes in providing spray dryers, sludge dryers, flash dryers, fluidized bed dryers, disc dryers, belt dryers, airflow dryers, boiling dryers, and vacuum drying. Machines, drum dryers, hot air circulation ovens, melt granulators, mixers, pulverizers, granulators and other services. Ruide Drying is famous at home and abroad for professional production of high-quality drying equipment.

# Ruide drying enterprise style

## Melting granulator

RL type melting granulator is the use of the characteristics of the melting point of materials is lower than 250 °C, according to the range of viscosity in the molten material

## Steel belt machine

This product is suitable for melting or softening point in all kinds of granulation materials needed for 50 °C to 300 °C, and there are "too cold crystallization properties of the material.

## Centrifugal Spray Dryer

The spray drying speed is fast, and the drying time only takes a few seconds, which is especially suitable for drying heat-sensitive materials.

## Pressure Spray Dryer

It is a device that can completedrying and granulation at the same time. According to the process requirements, the required spherical particles

## Spin flash dryer

Reasonable design, wide application range, large production capacity, high efficiency, energy saving, drying, crushing and screening are completed in one equipment at one time.

## Product Category

Dryer

Mix

Smash

Particle

Other

LPG series centrifugal spray dryer

Traditional Chinese Medicine Extract Spray Dryer

YPG series pressure spray dryer

PLG Series Disc Continuous Dryer

XSG series spin flash dryer

JYG series hollow paddle dryer

ZLG series vibrating fluidized bed dryer

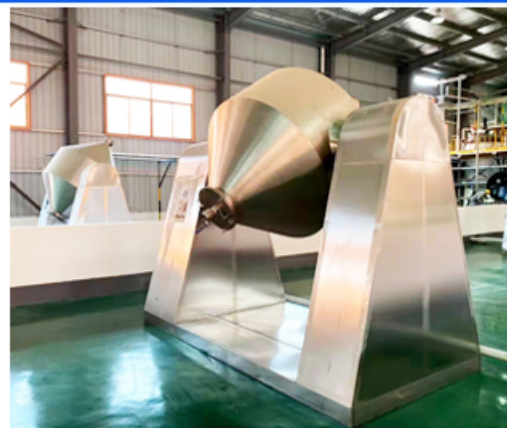

RL series melt granulator

YZG/FZG series round and square vacuum dryer

ZB series vacuum rake dryer

SZG series double cone rotary vacuum dryer

ZLD series ribbon vacuum dryer

FGF Series High Efficiency Boiling Dryer

FG series vertical boiling dryer

XF series airflow dryer

QG series airflow dryer

QFF series intensified airflow dryer

DW series single layer belt dryer

DW series multi-layer belt dryer

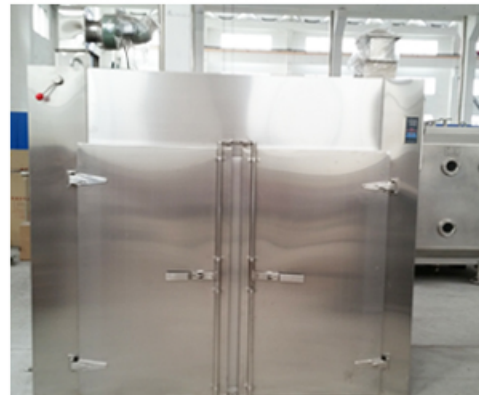

DWT series dehydrated vegetable dryer

HZG series rotary drum dryer

HG series drum scraper dryer

CT-C series hot air circulation oven

GMP series medicinal oven

EYH series two-dimensional mixer

SYH series three-dimensional mixer

VHJ series mixer

HF series square cone mixer

GH series trough mixer

GHJ series high speed mixer

WLDH series ribbon mixer

DSH series conical twin screw mixer

30B series universal crusher

WFJ series ultrafine pulverizer

With dust removal and crushing unit

CSJ Series Coarse Crusher

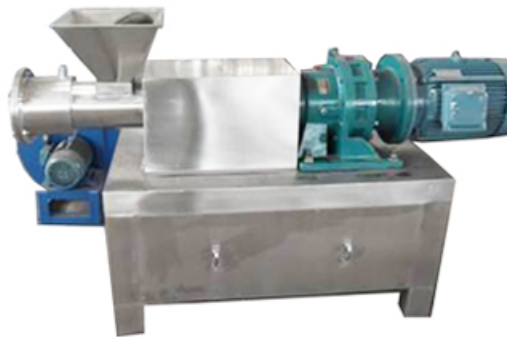

FL series boiling granulator

ZLB series rotary granulator

YK series swing granulator

SET series twin screw extrusion granulator

GHL Series High Efficiency Wet Granulator

ZS series circular vibrating screen

FS series square vibrating screen

Finned tube radiator

ZSL series vacuum feeder

REY series oil and gas hot blast stove

Stainless steel drying car

Our Customers

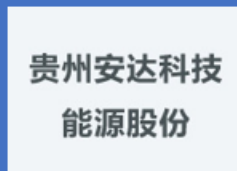

Part 04

# Our Client

Products are widely used in chemical, pharmaceutical, metallurgy, feed, fertilizer, dye, food and other industries. Customers are located in most provinces, cities and autonomous regions of the country, and exported to Europe, America, Southeast Asia and Japan and other countries, and are well received by customers.

# Engineering Case

Products are widely used in chemical, pharmaceutical, metallurgy, feed, fertilizer, dye, food and other industries. Customers are located in most provinces, cities and autonomous regions of the country, and exported to Europe, America, Southeast Asia and Japan, etc., and are well received by customers.

Pharmaceutical  
Industry

Food Industry
