Q2 What is the advantage of your pvc marble wall panel?

A: pvc base board

Pvc base board is mainly composed by pvc resin and calcium carbonate, the content of pvc resin is 30%, which is the main factor of influence the price, we promise use the 100% pure material, there is little color difference in pvc board. Therefore it is no difference of same design. We can supply long term stability and it is no difference in each batch.

Our pvc panel have good flexibility and avoid fragile. so product can bend 180 degree, and that's the way you can see the quality of pvc marble panel.

Q.16.What is the thickness of UV coating and hot printing film.

UV coating:Normally 0.04mm ,0.06mm maximum. Not the thicker the better ,above 0.06mm, the coating will get crack when bended.Cost are different accordingly.

Film:0.10mm.

Q.17.What is the hardness of the panel.

A.There is no special hardness data for panel, but hardness of UV paint is $\geq 3-5H$.

Q.18.Temperature of hot printing ?

A.140degree Celsius.

Q.19.Could i have my own logo ?

A. Of course. The protective film without logo 0.03mm as thickness will be enough, but if you wanna have your own logo , the protective film thickness reach to 0.04mm at least for printing logos. Cost will be a little be difference.
