Hexagonal Mesh Gabion Box

1. Usage:

Gabion Baskets and Gabion Mattress are stone containers, uniformly partitioned into internal cells, interconnected with other containers and filled with stone at site to form flexible, permeable, monolithic structures to control and guide water or flood, protect dam or seawall, or used as retaining walls, channel lining and other applications.

Gabion mattress is similar to gabion basket. But gabion mattress's height is lower than gabion basket, structure is flat and big.

2. Material:

Low carbon steel wire

Zinc/Aluminum coated wire

Stainless steel wire

PVC coated wire
