OEM/ODM products show

6mm thickness bearing housing

Production Process

With strict production flow and inspection, to ensure the high quality.

First Step: Mold design and making

OEM/ODM orders are no problem, since we can design and make precise molds ourselves, to save money, time and labor.

Production Process

Second step: Producing and stamping

Material cutting ➡ 3-5 times stamping ➡ Final finishing ➡ Hole punching and edge trimming

Production Process

Third step: Inspecting

From the material to the end products will all be inspected. And with professional inspection equipments, both of the specification and quality will be controlled strictly.

Production Process

Fourth step: Packing

Before packing, the products will be cleaned and oiled.

Then professional and standard packing is used to protect the products.

- Market&Customers

Exhibitions

We have attended many exhibitions in different countries, such as America, Australia, India, Chile and so on.

We have won the trust of many customers from the exhibitions.

And we will attend more in the future.

Market

Over the 20 years, we have supplied our products to many clients from almost 20 nations, Italy, Germany, USA, Australia, Chile, India, Korea, Russia

Most importantly, we have cooperated with several world top companies, so just trust our capability.

04

Future

Look ahead

Look ahead

2 new automatic Robots production lines have been installed, and more and more advanced technology and equipments will be introduced and imported, to achieve much more higher quality and capacity.

Our goal is to use Robots instead of labors and become international first-class level company. And we will try our best to achieve it within 3 years.

Qufu Zhuoyue Heavy Industry Science&Technology Co., Ltd

achieve mutual benefits
