HARM TO THE PLANET

TRUE COMMITMENT TO SUSTAINABILITY

WE HAVE ALWAYS PLACED GREAT IMPORTANCE AND EMPHASIS ON BEING ETHICAL AND SOCIALLY RESPONSIBLE, WITH A TRUE COMMITMENT TO ENVIRONMENTAL PROTECTION, ANIMAL WELFARE AND SUSTAINABILITY.

We believe in total transparency from the provenance of raw fibre through the whole production process, always meeting very strict eco guidelines.

As leaders in luxury yarns we have been pioneers in the development of organic cashmere as part of China's green and eco-friendly enterprise, which produces over 10,000 tons of yarn annually.

We are constantly looking for ways to improve our sourcing and methods of production to reduce our impact on the environment around us, ultimately creating a more sustainable future.

OUR COMMITMENT TO SUSTAINABILITY INCLUDES

- **SUSTAINABLE AND RECYCLABLE** – we produce 200 to 500 tons of high grade natural recycled yarns annually
- **ORGANIC AND TRACEABLE** – initiating special breeding programs in China to make organic and traceable cashmere possible
- **GREEN AND ECO-FRIENDLY** – pioneering new production processes to use green energy and implement energy recycling
- **ANIMAL PROTECTION** – conscientiously caring for animal welfare and the protection of grazing pastures.

AURORA ECO

2/26nm 100% Royal Cashmere

AURORA ECO REFLECTS THE RAW NATURAL BEAUTY OF PURE CASHMERE AS IT IS FOUND NATURALLY IN A COLLECTION OF 6 UNDYED CASHMERE SHADES BLENDED FROM THE 3 NATURAL TONES OF A CASHMERE GOATS COAT – CREAMY WHITES, WARM GREYS AND EARTHY BROWNS.

The fibres retain all of their natural characteristics: purity of colour, super soft handle, durability, and breathability, with the added bonus of offering a pollutant free biodegradable option cradle to cradle.

Completely dye-free, and with only the essential processes of blending, carding and spinning applied, this is cashmere in it's most pure true form. The beautiful natural hues are a result of well cared for cashmere goats that graze on a healthy diet in rich mountainous pastures with plenty of sunshine and water.

PURE UNDYED CASHMERE

TRACEABLE

Aurora Eco forms part of our essential program for offering full traceability for our fibres to achieve more sustainable supply chains to reduce environmental impact. Undyed cashmere offers the ultimate solution for customers looking for truly organic sustainable luxury yarns that are both kind to your skin and to the planet.

The Consinee Group fully understands the importance of responsible cashmere production from farming to final product, implementing a strict monitoring and careful testing system for every step of the cashmere development process, giving reassurance to customers they are receiving the best quality and most ethical cashmere they can buy.

The Good Cashmere Standard

We are proud to be awarded the Good Cashmere Standard. This certification stands for sustainably sourced cashmere from farms where goats are treated responsibly, the environment is protected, and the social, ecological, and economic living conditions of cashmere farmers and their families are respected.

The Good Cashmere Standard® is an initiative of the Aid by Trade Foundation with the aim of creating, promoting and implementing a benchmark standard for sustainable cashmere.

The Standard incorporates the Five Freedoms as defined by the Farm Animal Welfare Council. The Good Cashmere Standard follows three main principles: promote animal welfare in cashmere production, support cashmere farmers to secure a sustainable source of income and protect the environment.

The Sustainable Fibre Alliance (SFA)

The Sustainable Fibre Alliance (SFA) is a non-profit international organisation working with the extended cashmere supply chain, from herders to retailers. Their goal is to promote a global sustainability standard for cashmere production in order to preserve and restore grasslands, ensure animal welfare and secure livelihoods.

Responsible Wool Standard (RWS)

RWS certification ensures that the wool comes from farms with a progressive approach to managing their land and treat their sheep responsibly. The goals of the RWS are to provide a tool to recognise the best practices of farmers to ensure wool comes from farms that uphold the highest environmental, ethical and socially responsible standards.

ATTENTION:

The rewinding operation must be carried out with certain machines and particular attention; therefore we advise not to rewind, unless absolutely necessary.

CARE INSTRUCTIONS:

Hand Wash or Dry Clean

Do not bleach

Dry flat, do not tumble dry

Iron at a cool setting

RECOMMENDED FINISHING:

A two bath method, using a designated detergent, will give the optimum handle. The first bath is designed to remove the spinning oil and residual dyestuffs and the second to mill the garments to the required handle.

The following recommendation is based on a rotary finishing machine. Water temperature: 40°C

Liquor ratio: 20:1 (20 Litres of water for every kilogram of garments)

Bath 1:

- 5-10% of non-ionic detergent based on weight of goods
- Run for 3 minutes
- Drain and rinse

Bath 2:

- 2-5% detergent, based on weight of goods
- Run for 3 minutes, depending on the handle required.
For a softer handle extend the time in this bath
- Drain and rinse
- 1.5% Softener maximum. Run for 10-15 minutes
- Standard tumble dry 70-80°C (60°C for light shades), until dry. Do not over dry
