

Movable Hydraulic Dumper (Tipper)

I. Introduction

XTQM series hydraulic truck dumper is truck bulk material unloading device that integrates electric and hydraulic control, and is widely used for bulk materials like grain, forage, cement and coke. The equipment improves production efficiency, saves unloading cost, and creates good economic benefit for the user.

Our company is the drafter of national standard of hydraulic truck dumper GB/T 21489-2008 [Bulk Grain Truck Unloading Device".

Movable hydraulic truck dumper is suitable for movable unloading of bulk materials like grain, forage, cement and coke, and can be used in industries of chemical, metallurgy, mining, port and coal.

II. Technical Data

Type	Platform size (length×width) (m)	Lifting weight (ton)	Tilting angle (degree)
XTQM-80	16.5×3	80	35
