# Contents

**1** PET rigid sheet films

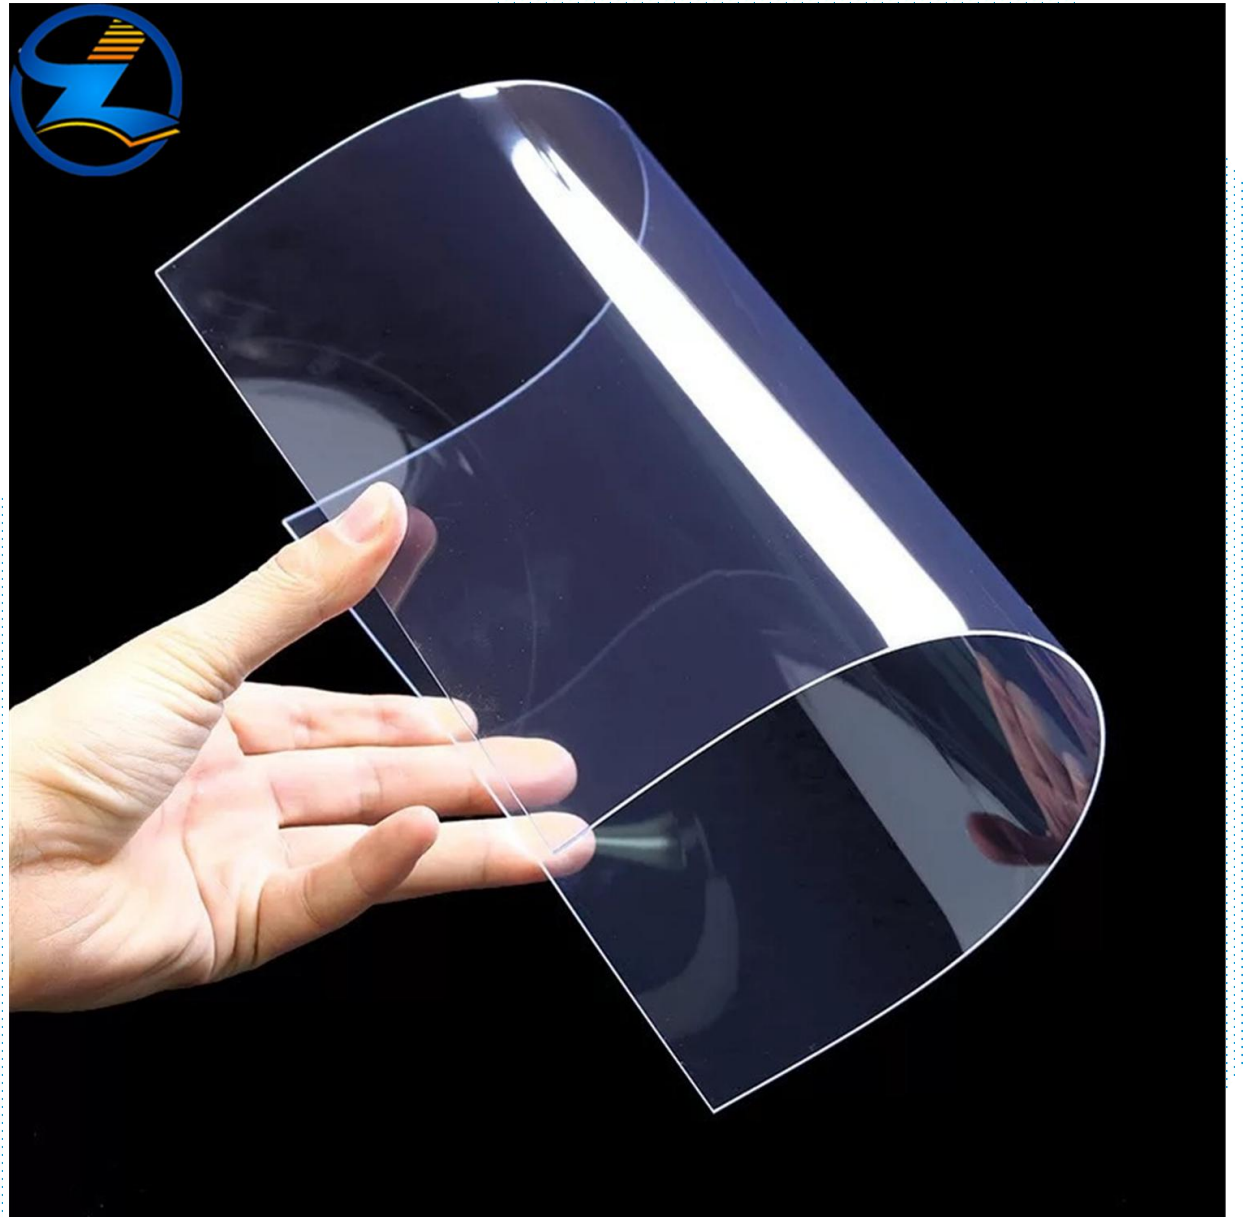

**2** PVC rigid sheet films

**3** PP rigid sheet films

**4** PS rigid sheet films

01

*PET transparent  
colored rigid sheet  
film for packing*

# Specifications

## details

1. Thickness: 0.15mm-2mm
2. Width: 100mm-800mm
3. Colors: Transparent and colorful

## Features

1. High transparency and glossy
2. Printable and Vacuum metallization
3. Anti-fog
4. Non-toxic and environmentally friendly

## function

1. Density: 1.36g/cm
2. Oxygen permeability: 4—4.5 cm\*mm/(m\*24 h\*0.1 mpa)
3. Moisture permeability:  $\approx 3G^*mm/(M^*24H)$
4. Elongation at break: 250%

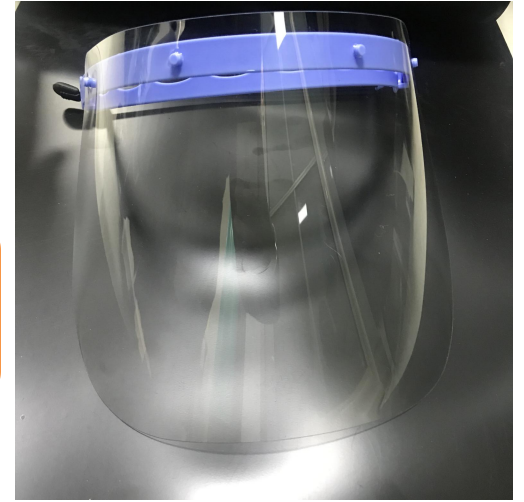

# Applications

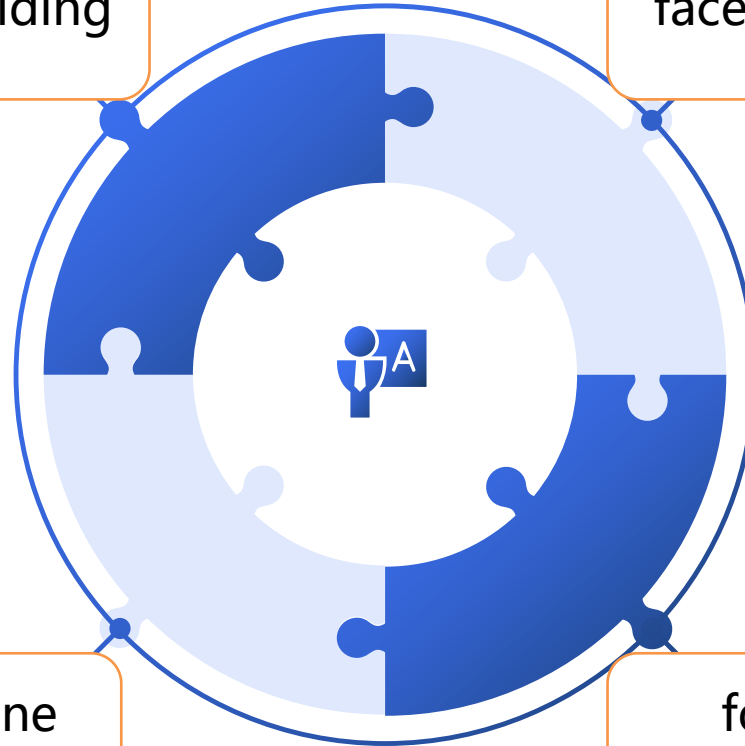

box folding

face shield

medicine  
packing

food  
packing

## Advantages

With excellent transparency and smoothness, good display effect

Excellent surface decoration performance

Good mechanical strength

Good barrier performance to oxygen and water vapor

Can withstand a variety of chemical substances

Anti-fog, non-toxic and environmentally friendly

02

*PVC transparent  
colored rigid sheet  
films for packing*

## Specifications

### Details

1. Thickness: 0.08mm-1mm
2. Width: 140mm-1400mm
3. Colors: Transparent and colorful

### Advantages

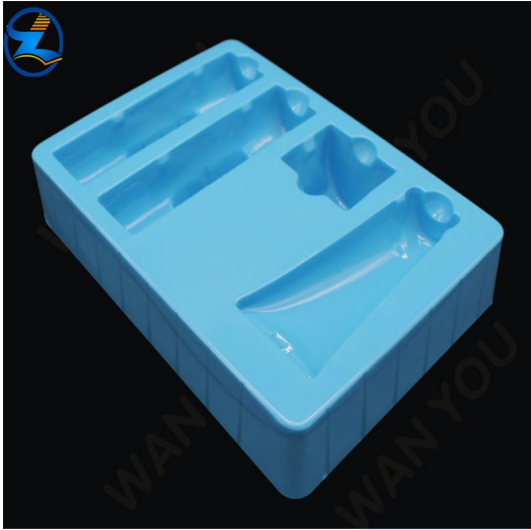

1. High transparency and high glossy
2. Can be colored, gilt and flocking.
3. Few crystal points and water waves
4. High resistance to impact
5. Easy molding
6. Food grade.

# Applications

01.

cosmetic packing

02.

food packing

03.

medicine packing

04.

clothing tag

03

*PP rigid sheet films for  
packing*

# Classification

Transparent PP sheet

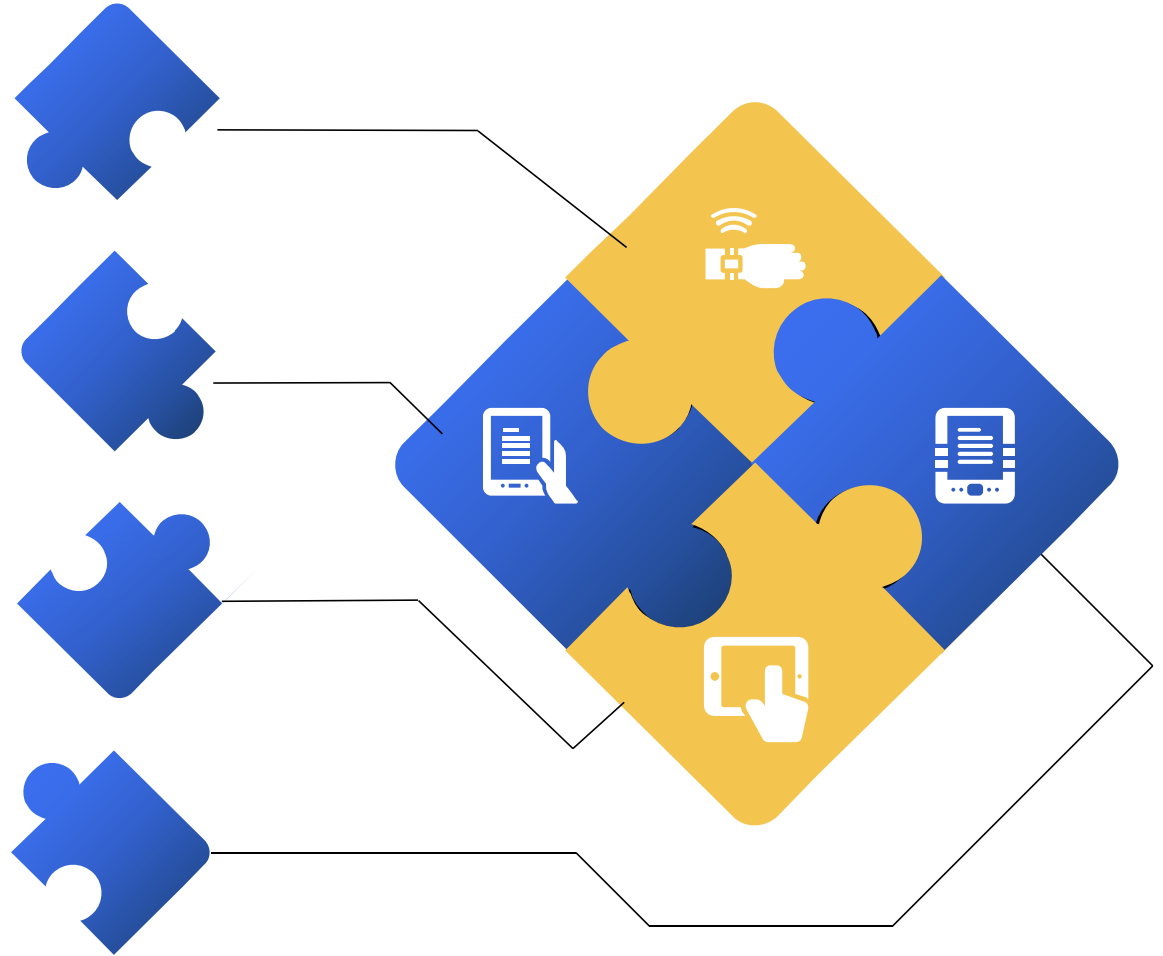

Colorful PP sheet

Gilt PP sheet

Flocking PP sheet

## Features

### 01.

1. Thickness: 0.18mm-1.6mm
2. Width: 18mm-160mm
3. Colors: natural color/ Porcelain white/colorful etc.

### 02.

1. High temperature resistance and moisture-proof, wisely used in food packing.
2. Excellent folding performance.
3. Environmentally friendly and cold-resistant.

### 03.

1. Conductive and anti-static
2. Lightweight and high glossy.
3. High mechanical strength
4. Non-toxic

### 04.

1. Vacuum thermoforming
2. Wisely used in food packing and cuo lids. etc.

# Applications

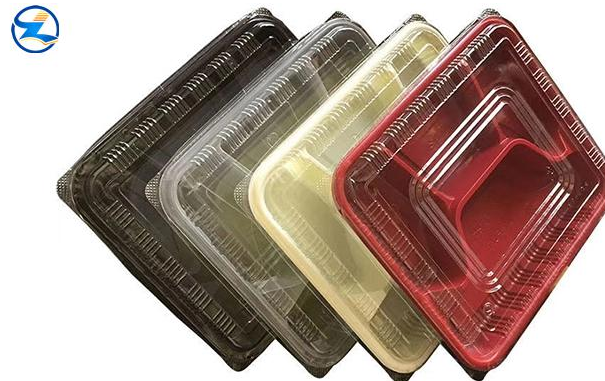

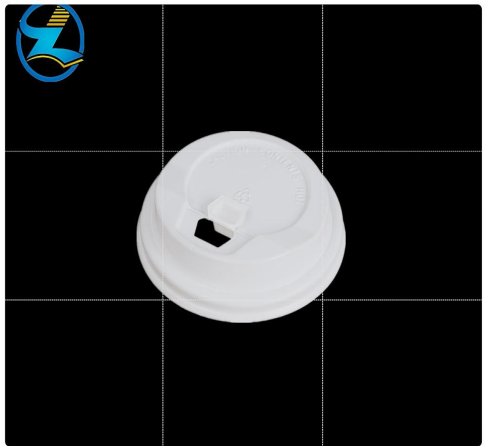

cup lid

food container

food container

fruit container

04

*PS rigid films sheet  
for packing*

## Product performance

1

- 1.Thickness: 0.18mm-2mm
- 2.Width: 100mm-800mm
- 3.Colors:natural color/Porcelain white/colorful etc.

2

1. Proportion: 1.04g/cm
2. Tensile strength:  
horizontal:  $\geq 26$ MPa vertical:  $24 \geq$ MPa
3. Heated size change:  $< 4\%$

3

1. Transmittance:  $\geq 85\%$
2. Health standard: GB9689

## Features

4

1. Low static electricity. Can used in Low static product packaging.
2. Easy vacuum forming.
3. Good defensive ability.

5

1. Easy to color, can be printed in different colors.
2. Good hardness. Can used for Cold drink cup.

6

1. Environmental friendly and recyclable.
2. Burning does not produce harmful substances.

# Applications

01.

Hardware tray

02.

Yogurt box

03.

Food trays

04.

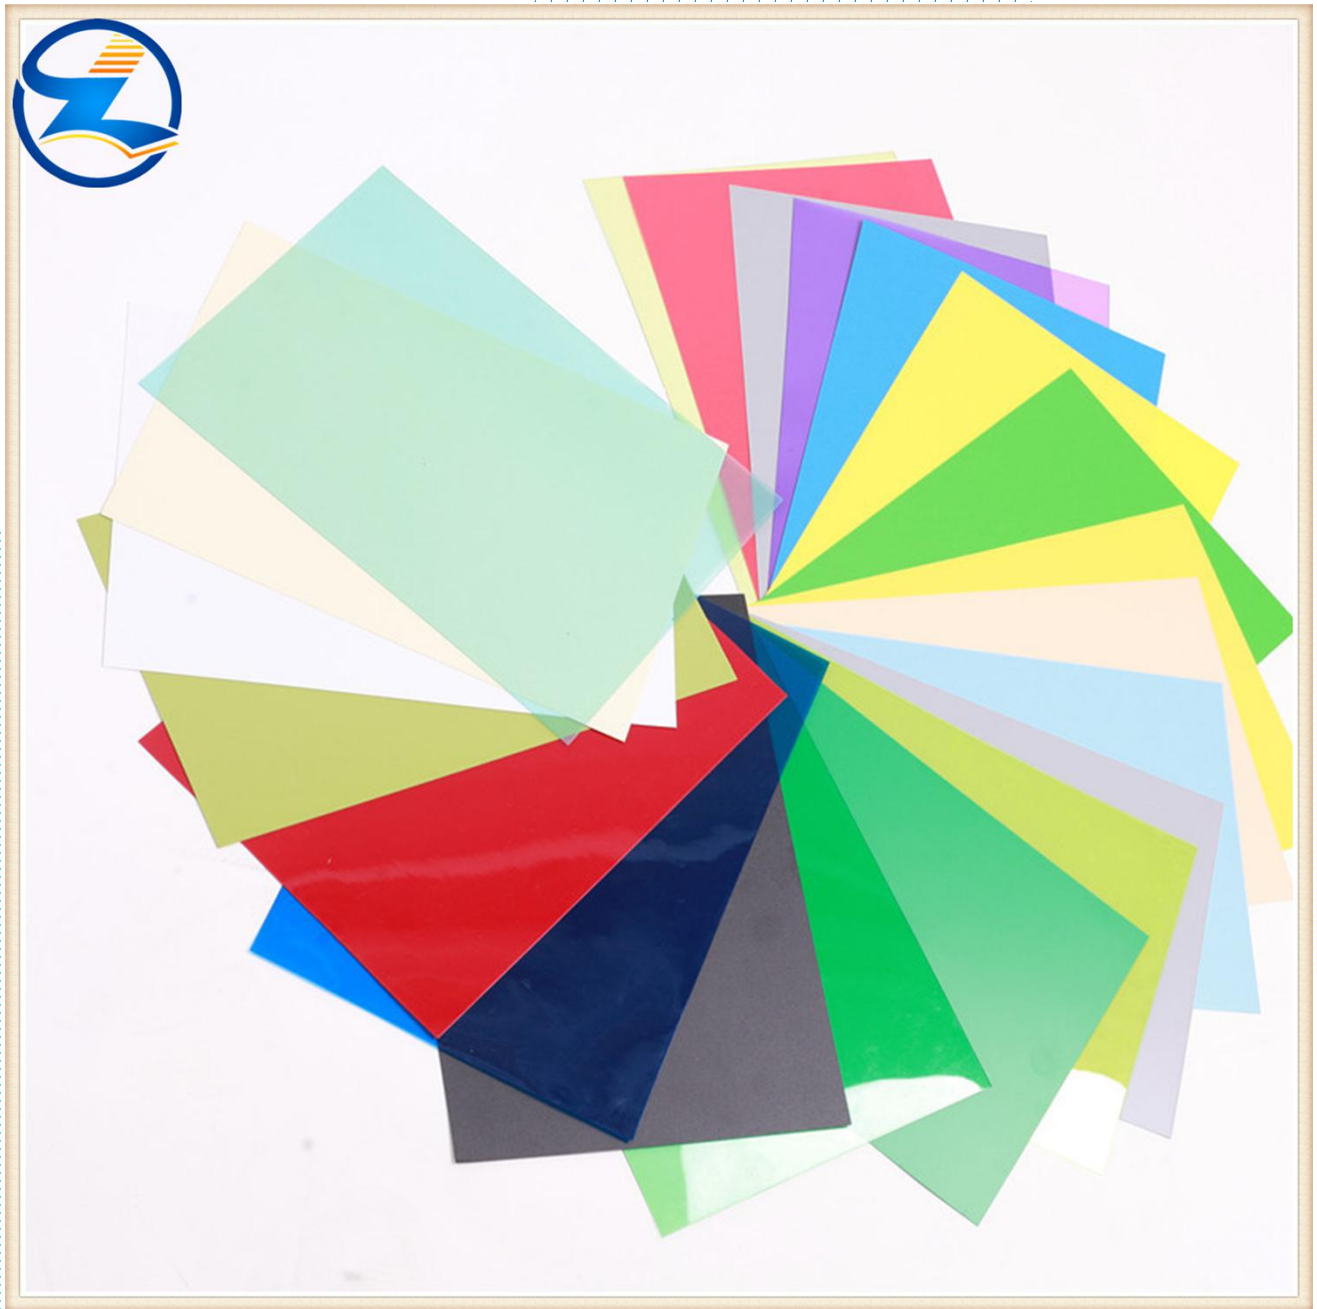

Food packing

05

*PC rigid films sheet  
for packing*

# Specifications

## Features

1. Thickness: 0.08mm-1mm
2. Width: 160mm-1400mm
3. Colors: gold, silver, purple, red, green, blue, black, etc.
4. Surface: glossy, sand, matte.

## Advantages

1. Best light transmittance among similar plastics, reach more than 90%
2. High scratch resistance of Matte material

## Advantages

3. Can adapt to high-strength scratching environment.
4. Superior printability, Toughness, Dimensionally stable, Not easily deformed

# Applications

luggage

light box

sun hat

sunglasses

# THANK YOU

Lynn
