- Suitable for industrial shirt folding and electric heated collar creasing
- Stainless steel folding plate standardizes the size of folded shirt
- The button trough can guide shirt buttons to the center line, thereby the folded shirt is always symmetric
- It can be used easily regardless of the upper hand, and table height is adjustable, therefore it can satisfy the operation requirement of different people
- Four different shaped collar moulds, i.e. triangular, round, almond and pear, are available; among which user could select one to be supplied. If no selection, triangular mould is defaulted
- For each specific collar shape there are 5 different-sized moulds; which can switch through rotation; pneumatically-operated collar creasing
