1. DSPOF manufacture a range of certified safe fibre harnesses which can be supplied in either a clear or a multi-coloured UV reactive sheathing. The harnesses inn kit types are made from polymer fibre and as with all of our fibre optic kits are safe to touch as no electricity or heat is transmitted through the fiber. The PVC in these harnesses is phthalate free and the harnesses themselves have CAN19 and ROHS,Reach test report so you can be sure you are purchasing a safe, high quality, China made product.

2. The colour change property of these sensory lighting kits stimulates the minds of young children and helps in identifying different colours and has also been found to be beneficial for children of any age with learning difficulties.

3. The sparkle fiber in these sensory lighting kits is also frequently used as decoration in the home or in commercial properties such as cafes, bars and restaurants.

### Usage of Fibre optic sensory kit

1. Provides multicolor interaction and close visual work
2. Encourages visual tracking and calming
3. For children and adults with auditory, speech, visual and sensory challenges
4. Suitable for all ages
